ABOUT ME

I am a beginner programmer with a deep interest in the Web-development. I have been studying programming for 1.5 years. I have basic knowledge in languages **PHP(OOP), MySQL** as well as experience in developing web applications on Laravel framework using JavaScript, **HTML, CSS, Bootstrap. Wrote several Pet-projects, with examples you can look at GitHub**. Completed courses on the basics of algorithms and data structures and design patterns. Actively adhere to the standards for writting PSR code. I am sure that my motivation and desire to learn new will allow me to successfully achieve my professional goals and achieve success in a career as a programmer

WORK EXPERIENCE

AI STARTUP
Trenčin
Mar 2023 - Apr 2023

LARAVEL DEVELOPER

My first commercial experience was a website generator. This startup is aimed at the US and Canadian markets. The project was written with the Laravel framework and using AI to generate pages.

ARTEM PSHENYCHNYI
Jan 2023 - Mar 2023

WEB DEVELOPMENT

Mini CRM system. Written in the Vue framework 3. In this project, I used such tools like Vue-cli, Vue-router, Vuex as well Materialize elements. authentication system and registration implemented using the database Firebase

ARTEM PSHENYCHNYI
Nov 2022 - Dec 2022

WEB DEVELOPMENT

The second project is an online fruit store.
Written in the Laravel framework using MySQL databases. The site consists of user part and administrative panels. For custom form processing parts and adding / removing goods to / from the basket asynchronous requests are used. On the site there is a full-fledged basket, and there is also comment block.

Git repository:
https://github.com/Pshnychnyi/fruitshop.loc
